**Comforts & Advantages**

In the event of power failure, the GEMB500 switches to the emergency mode and operates one of the existing lamps for 90 minutes. The unit contains a battery, charger and inverter circuit in a single can. The GEMB500 can be mounted in a wireway or on top of the fixture and is UL Listed for factory installations or retrofit applications. The NLRB 1 can be used with most 2' - 4' lamps, with an initial output of up to **500** lumens for one or two lamps.
