

High Efficacy LED Lighting For Parking Applications

example LED retrofit, savings of \$18,000 / year

Superior Performance

RedBird LED parking luminaires use our own high efficacy tube lights for space and energy savings.

Optimal Light Distribution

Controlled directional intensity provides uniform illumination, excellent for applications such as parking garages. Can be adjusted in the field.

Affordable Technology

High quality LED lighting (50,000 hours, no ballast, solid state electronics) that is cost competitive today.

Best Retrofit Option

RedBird LED's four tube parking luminaires can replace 1-for-1 metal halide lights. Another option is to purchase just the tubes to replace fluorescent tube lights.

Features

- Universal voltage (110~285 VAC)
- 50,000 hour LM79 lifetime with 5 year warranty.
- Exposed light and enclosed fixtures available.
- 40 W (2,800 lumen) or 80 W (5,500 lumen) options.
- No mercury content.
